"Download Need for Speed: Undercover (Region Free)" is available for sure. Besides, the game "Need for Speed: Underground 2 PC Free Game" is also very worthwhile.Q: How to check the duplicated values in sql server? Please I want to see in sql server, the duplicated values in a particular column. I have some column like name id job color abc 999999 acd 999999 bcd 999999 abc 500000 abv 999999 abv 500000 and so on... In this case I want to know that in the column name id there are many IDs as it is the duplicate, similarly the same goes for the column job. Hope I am not asking something very stupid. Please help. A: You could use a window function: select name, id, job, color, row_number() over (partition by name, id, job order by name, id, job) as grp from tablename; If you wanted to only count duplicates, then use: select name, id, job, color, count(*) over (partition by name, id, job order by name, id, job) as dupes from tablename; // Copyright 2015 CoreOS, Inc. // // Licensed under the Apache License, Version 2.0 (the "License"); // you may not use this file except in compliance with the License. // You may obtain a copy of the License at // // // // Unless required by applicable law or agreed to in writing, software // distributed under the License is distributed on an "AS IS" BASIS, // WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. // See the License for the specific language governing permissions and // limitations under the License. // +build!windows package capnslog import ("errors" "os" "path/filepath" "github.com
